Commerce Related Questions

Do you accept purchase orders?
Yes, with the following limitations. We offer Net 30 terms only with pre-approved credit, based on completion of credit verification using three customer-supplied U.S. credit references. Initial orders that require faster service may be accommodated with either wire transfers, credit (or procurement) cards or C.O.D..

Is there a minimum order quantity?
Our minimum order is $100.00 U.S. for Co-NETIC®, NETIC®, and MuMETAL®, magnetic shielding material. Distributors are located throughout the U.S. that can provide smaller order service. Please contact our customer service department to inquire about distributors servicing your location.

Do you have materials in inventory and ready for shipment?
Yes, we maintain a substantial inventory of the raw material sheets and foils. However, we do not maintain an inventory of finished goods (formed to specific shapes), unless contracted to do so.

What size is your raw material sheet?
Our smallest standard sheet size for Co-NETIC®, and NETIC®, materials is 30" x 14". The next larger standard size is 30" x 29", which can be shipped by UPS and Federal Express. Larger sizes are also available. Refer to our catalog CP-1 and NT-2 for a listing of available sheet and foil sizes. The smallest sheet size available for MuMETAL®, is 12" × 15". Refer to our catalog MU-2 for a listing of available sheet and foil sizes. We will shear for shipment as part of our minimum order requirement.

What are your shipping terms?
Magnetic Shield Corp. ships Ex-Factory, Bensenville, Illinois, 60106 U.S.A.

Do you ship internationally?
Yes, frequently. Magnetic Shield is known world-wide for the quality and reliability of our materials, and manufacturing processes. The primary restriction on shipment of our materials into other countries is adherence to the rules and regulations as stated by the U.S. Department of Commerce "Export Regulation & Restrictions, Bureau of Industries and Security".

Are there any special requirements for shipping magnetic shielding material?
While there are no requirements for shipping our materials other than protective coverings to prevent damage, recently certain international countries have instituted new rules regarding receipt of materials in wooden crates. If the destination country requires the use of a "Certificated" wood (specifying it is free of larvae and/or insects), an additional charge will be made for this special crating.
